Tech Stack

Languages: JavaScript

Front-end: React, React Native, HTML, CSS, SCSS (SASS)

Back-end: Node.js, Express.js, PostgreSQL

Test: Jest

Cloud: Firebase

Work Experience

Home Bargains - Store Assistant

Mar 2023 - Current

Working as part of a team ensuring the store stays clean, stocked and running smoothly throughout the day. Transferable skills: teamwork, communication, time management, multi-tasking and the ability to complete tasks under time constraints.

Northcoders - Trainee Software Engineer

Aug 2022 - Dec 2022

A coding bootcamp where I learned JavaScript. I was taught standard git practices, Test Driven Development, front-end and back-end fundamentals, database management, mobile app and website creation and hosting.

A R Services - Customer Service Assistant

Jun 2019 – Aug 2022

Handled customers face to face and over the phone. Greeted customers arriving and was the first point of contact. Handled frustrated customers queries regarding any issues and provided remedies as necessary.

Hadson Ltd - Retail Assistant

Jun 2016 – Jun 2018

Engaged with customers and built relationships with regulars. Input the daily finance details on Excel for the business and updated inventory. Advertised deals and upsold products in order to meet weekly and monthly targets.

Community hall (CSMA) - Volunteer

Jun 2014 – June 2022

Prepared and helped around the local community hall for events. Set up tables and chairs, served food and cleaned up after the events. Greeted members on arrival and managed the front desk taking entry fees. Took extra care of elderly members, ensuring they were comfortable.

Projects

Northcoders Games Project

[Hosted Website](#)

A web app that gives the user the ability to search for and review board games. (Solo Project)

- Communicated with the RESTful API.
- Seeded, tested and deployed a database with PostgreSQL.

GitHub: [Front-End](#) | [Back-End](#)

Why Not? Project

[App Demo](#)

A social media-esque app where users can create an account and upload items to their bucket lists. These items can be completed and shared with others. (Group Project)

- Created using React Native.
- Used a cloud database called Firebase.
- Communicated progress during daily SCRUM meetings and used the Kanban methodology to manage tasks.

[GitHub](#)

Snooker Scorer

A mobile application created using React Native where a user can keep track of the score of the game of snooker they are playing easily.

[GitHub](#)

Learn Cutchi

Generations ago, my family migrated from India to different parts of East Africa. A language called Cutchi, which is a mix of Kutch and Swahili, was created and still used to this day. This app facilitates the learning of the Cutchi language making it accessible and enjoyable. This app reflects my commitment to preserving cultural heritage through technology.
